

DRIMS User Manual

1. Introduction and Overview

1.1 Quick Start Guide

If you need to use the system immediately, follow these core workflows:

For Citizens:

Register → Submit Report → Detail & Pin → Track

For LGU Officers:

Monitor Heatmap → Validate AI → Dispatch → Merge Duplicates

For Super-Admins:

Promote Users → Deploy Constraints

1.2 System Purpose and Objectives

DRIMS is a web-based system for disaster report management using AI (NLP and clustering).

1.3 User Roles

Citizen – Submit and track reports

LGU Officer – Review, validate, dispatch

Super-Admin – Configure system and manage users

1.4 Requirements

Supported browsers: Chrome, Firefox, Edge

Stable internet required

Recommended resolution: 1366x768

2. Authentication and Onboarding

Users register via Email, Google, or Facebook and must complete identity verification.

3. Citizen Portal

Submit incident reports, track status, interact with complaints.

4. LGU Command Center

Includes Heatmap, Review Queue, Assignments, Analytics, Dictionary Manager.

5. Super-Admin Configuration

Includes system settings, logs monitoring, and user management.

6. Deployment

Uses Supabase backend and can be hosted on Vercel, Heroku, or VPS.

7. Troubleshooting

Includes system notifications, common errors, and solutions.
